PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8929 SESSION NUMBER: 03
DATE OF SESSION: 22 NOV 89 DATE OF REPORT: 21 NOV 89
START: 1005 END: 1217
METHODOLOGY: SOLO VIEWER IDENTIFIER: 018

SG1A

2. (S/NF/SK) VIEWER TASKING: See your sketches and related information provided in the previous two sessions. Probe your sketches and pursue them until such time as you run out of structure(s). Probe right, left, and underneath. Describe the nature of the activity in a given area (this may be pursued in yet another session.

3. (S/NF/SK) COMMENTS: No inclemencies noted. Need to continue to probe within and beyond the input of sketches. A Summary of Information is attached to this report.

4. (S/NF/SK): EVALUATION:

5. (S/NF/SK) SEARCH EVALUATION:

WORKING PAPER

Project: 8929
Date: 891121
Time: 1005-1217
Viewer: 018
Session: 03

SUMMARY OF INFORMATION:

1. (S/NF/SK) Probe outside the underground portion of the structure and describe perceptions:

a. Probing the underground area outside the structure located an air-vent a little way from the structure (see prob map, page 3A). The air vent goes down a good way into the ground. I could hear "people" sounds from below, and another sound not unlike the "rush" of subway trains. I postponed following the air vent to its bottom until completing the probe of the area around the building. Once a stairway down was found, I did not come back to the air vent.

b. There is a stairwell which leads out of the next-to-the-bottom floor of the basement of the structure. I could not determine how far down the stairwell went (in terms of feet), but followed it to the bottom.

c. (See FIG. 1 for a graphic sketch of the following) At the bottom of the stairwell a small corridor (approximately 15'-20' in length) goes off to the immediate left of the last step. As you go down this short corridor, there is a door on your right which leads into a very large "tunnel". This door is locked and is not used. I had the impression of a sign on the door which said, "VVOD NELZHYA" ("Entry not permitted" in Russian).

d. At the other end of the short corridor, there is a turn to the left, as the corridor continues for approximately 10 feet. At the end of this is a heavy metal door which stands open.

~~SECRET~~

e. On the other side of the door is a single flight of steps down, ending in a landing which has a doorway to the right. This doorway is topped with an "archway". The door goes through a very thick cement and metal wall. The door of this doorway is in the middle of this wall, and closes by sliding down from the top (see FIG. 2).

f. Beyond this door is a room which is approximately 15' X 30'. It has a small area which appears to be dedicated for medical attention, but the rest of the room is lined with what appeared to be racks of electronic equipment. The equipment is very plain-fronted (not many dials, lights, knobs, etc.). The room appears to be for a group of people to work in, but definitely in a "no-frills" working environment.

g. There was a person in this room at the time of viewing. The person had a clipboard with what appeared to be a "checklist" on it.

~~SECRET~~

Below the vertical metal door,
there is a ^{single} flight of stairs, then
a doorway with an arched top.

This doorway leads into a room
± 15' x 30' which has ~~what appears~~
to be racks of ~~wall-mounted~~
electronic equip w/ ^{looking} provisions.

There is a person w/ three
"NO-FACES"
with a checklist.
Approaches to this room.

Session end
1217 hrs.
